## AMAFCA APPROVES REDISTRICTING RESOLUTION

### *Westside will be represented by two Directors on the five Member Board*

**ALBUQUERQUE** – FEBRUARY 24, 2012 - The Albuquerque Metropolitan Arroyo Flood Control Authority (AMAFCA) Board of Directors approved a resolution during its regular February Board Meeting that redefined the five member district boundaries in Albuquerque. The adopted [plan](#) was finalized earlier this month ending a four-month process of public meetings that developed new boundaries to address population growth and population shifts within the AMAFCA boundaries.

The AMAFCA Board of Directors' understanding of the unique needs on the Westside of Albuquerque and potential growth areas in the southeast and southwest quadrants modified the boundaries such that the Westside of Albuquerque will be represented by two Directors, and the southeast quadrant will have one Director to represent their interests.

The Board of Directors has given the Westside of Albuquerque a voice in flood control and water quality projects in Albuquerque since 2000, when they established one unique District that represented the entire Westside on the five Member Board.
