

AMAFCA

**SOUTHWEST
VALLEY**
*Flood
Reduction Project*

Public Meeting

Please join us at

**Rio Grande High School Auditorium
2300 Arenal Rd SW
Albuquerque, NM 87105**

**October 2, 2013
5:30 pm to 7:00 pm**

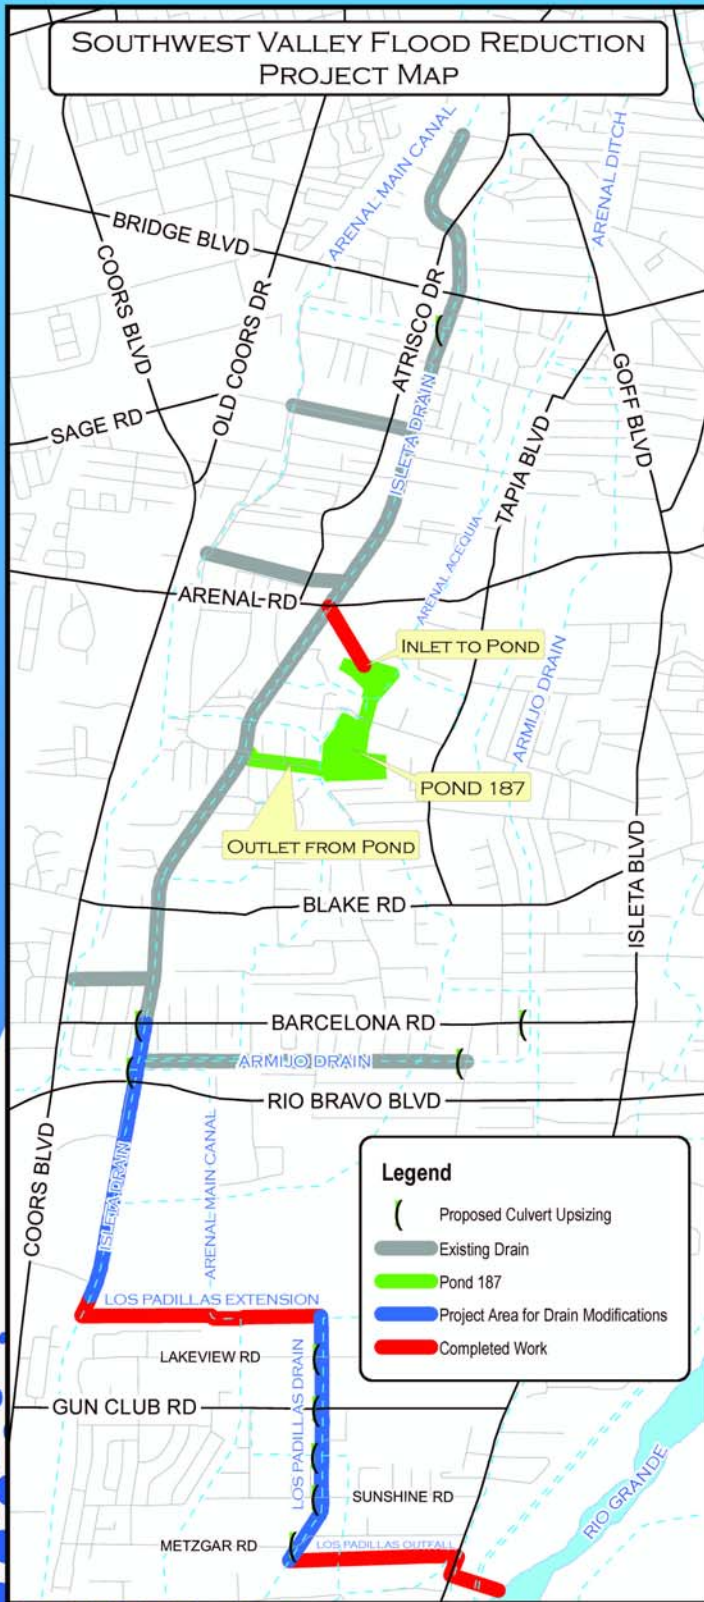

**Questions?
Please call**

**Catherine Lopez
with Bernalillo County
505-224-1641**

**Jeffrey Willis
with AMAFCA at
505-884-2215
amafca.org**

**Ronna Schelby
with USACE
505-342-3353**

SOUTHWEST VALLEY Flood Reduction Project

In Phase 2A, AMAFCA will connect the outlet from Pond 187 to the Isleta Drain. This will allow storm water to be diverted into Pond 187 and reduce flood hazards in the vicinity. This phase of the project will be completed after the USACE completes their phase of the project to construct Pond 187 and Bernalillo County completes their phase of the project to upsize culverts.

In Phase 2B, The County will upsize several culverts in the Isleta, Los Padillas, and Armijo Drains to alleviate major hydraulic choke points, thereby greatly increasing drain capacity for handling storm-water flows

US Army Corps of Engineers

In phase 2C, the USACE will design and excavate Pond 187 to hold storm-water and reduce flood hazards in the vicinity. The USACE will also be re-grading approximately 1.2 miles of the Isleta and Los Padillas Drains in the lower end of the system to improve capacity.
